Code Quest 5: The Haunted Mansion

You and your friends are trapped in a haunted mansion! Ghosts roam the halls and puzzles guard every door.

Solve Python riddles to escape before midnight... or be trapped forever!

Level 1: Ghostly Greeting

Reverse the name of a ghost and return it in uppercase.

Example:

Input: 'Casper' -> Output: 'REPSAC'

Level 2: Candle Timer

A candle lasts 10 minutes per inch. Given height in inches, return total burn time in minutes.

Example:

Input: 3 -> Output: 30

Level 3: Haunted Numbers

Return only the odd numbers from a list, sorted in reverse order.

Example:

Input: [3, 2, 5, 8, 1] -> Output: [5, 3, 1]

Final Level: Unlock the Secret Door

Combine the first letters of each word in a list into one uppercase word.

Example:

Input: ['ghost', 'under', 'bed'] -> Output: 'GUB'
